SOFTWARE DEVELOPMENT & INFORMATION TECHNOLOGIES BACHELOR'S AND MASTER'S STUDENT

ABOUT

I am a hard-working student of information technologies and software development at Epitech Barcelona.
I am always excited to start new projects and learn new things to develop myself as a person and as an aspiring software developer.
I learn fast and I think I can be a great addition to your team. Although being a student, I have already amounted many hours of coding and projects, whether they are for university, other companies or for myself.

EDUCATIONAL HISTORY

EPITECH - European Institute of Technology
Bachelor's and Master's in Software Development & Information Technologies | 2020 – 2025

Escola Pia Granollers
Techno-scientific Spanish High School Degree | 2018 – 2020

Academica International Study
Dual Diploma, Bac + USA High School Degree | 2017 – 2020

PROFESSIONAL EXPERIENCE

Rzilient
Full-stack developer intern
Building and maintaining two websites & developing micro-services on Google cloud. | Jul 2021 – Jan 2022

Slave Computers SL
IT manager intern
Assembling computers and handling IT-related problems. | Jul 2017 – Sep 2017

MY PROJECTS

As a student in Epitech I have developed more than 60 projects; mainly in C, C++ and Python and lead groups of 2-6 people. I take part in organizations such as the Google Developer Student Clubs and E-mma, where we organize and participate in workshops, talks and events related to programming and tech.
On my free time I like to develop projects such as mobile apps, websites and other coding challenges to further improve my knowledge and have fun.
