POL ARAGONÈS

1ST YEAR IT STUDENT

ABOUT

I am a hard-working 18-year-old first-year student of information technologies at Epitech Barcelona. I am always excited to start new projects and learn new things to develop myself as a person and as an aspiring programmer. I am currently fluent in C, Python, Ruby, VB, and Java; but I would like to learn other languages in the near future. I learn fast and I think I can be a great addition to your team. Although being in my first year, I have already amounted many hours of coding and projects, whether they are for university or for myself.
