ABOUT

I am a hard-working 18-year-old first-year student of information technologies at Epitech Barcelona.
I am always excited to start new projects and learn new things to develop myself as a person and as an aspiring software developer.
I am currently fluent in C, Python, Ruby, VB, and Java; but I would like to learn other languages in the near future.
I learn fast and I think I can be a great addition to your team. Although being in my first year, I have already amounted many hours of coding and projects, whether they are for university or for myself.

EDUCATIONAL HISTORY

EPITECH - European Institute of Technology
Bachelor's and Master's in Software Development & Information Technologies | 2020 – 2025

Escola Pia Granollers
Techno-scientific Spanish High School Degree | 2018 – 2020

Academica International Study
Dual Diploma, Bac + USA High School Degree | 2017 – 2020

EXPERIENCE

· Slave Computers SL: Duration: 2 months summer job
Role: Building/Repairing computers and tech support | 2017

I have developed 50+ projects, mainly in C and Python, and led 10+ projects of groups of 2-6 people.
As part of the Google DSC and E-mma I regularly organize and participate in programming events such as hackatons, workshops and talks.

TOOLS & TECHNOLOGIES

Git, GitHub
Microsoft Teams, Slack
Linux OS, Windows
CAD
RaspberryPi, Arduino
